

- > Communication Lab s.a. (Comlab), a small business founded in 1997 by Guy Coupez and Stéphane Hougardy, offers solutions based on digital technologies to facilitate and accelerate the flow of information within an organisation.

MISSION AND VALUES

Our mission is to improve our clients' internal and external communication. We offer a high level of service built on the values of competence, experience and realism.

PRODUCTS AND SERVICES

> DIGITAL SIGNAGE - DYNAMIC DISPLAY

Digital signage, or dynamic display, is revolutionising communication at points of sale or in public places. The technology developed by Comlab allows you to broadcast your information automatically and remotely on large networks of screens or interactive terminals.

> INTERACTIVE TOUCHSCREEN TERMINALS

Our interactive terminals, placed in your points of sale, allow you to present your products and services to your clients. Based on a touchscreen technology, they are extremely easy to use and offer your visitors and clients a unique navigation experience.

> VIKUITI™ SCREENS

We distribute the Vikuiti™ Rear Projection Screen (3M). These large-format screens, available as adhesive films or Plexiglas screens, allow images to be projected in ambient light with exceptional luminosity and contrast levels.

Vikuiti™ screens are ideal as part of a digital signage solution. This technology is a leading solution for large screens (60" and upwards).

> MULTIMEDIA CREATION STUDIO

Our studio produces Flash animations, interactive applications for any medium (CD, DVD, USB keys...), web post-production and audio/video processing.

> INTERNET - EXTRANET SOLUTIONS

We create websites, portals and web-based applications on an entirely tailor-made basis. The types of application include e-commerce solutions, enterprise portals and large public sites such as **www.carbu.be**

CLIENTS

Our clients are leading players in the fields of telecommunications, culture, audiovisual, communications, the pharmaceutical industry etc.
